# WHY EAT BREAKFAST?

#### **Breakfast tips**

- Make small changes in your morning routine. If you are not a breakfast eater, start by adding a glass of milk or a piece of fruit.
- It's all about balance. Enjoy bacon and eggs one day and a bowl of oatmeal topped with raisins and fat-free milk the next.
- Try nontraditional breakfast foods, like pasta or crackers with cheese.
- Enjoy all foods in moderation. If you like sugar-coated cereal, mix it with whole-grain cereal.

### Not hungry in the morning?

- Begin with a small meal, such as whole-wheat toast and juice.
- Take something with you for a mid-morning snack.

### **Easy, nutrient-packed**

- Whole-grain cereal topped with a banana and low-fat milk
- Breakfast smoothie with blended milk, fruit and bran
- Yogurt topped with granola
- Trail mix made with your favorite cereal, nuts and dried fruit
- dinner with a glass of low-fat milk

- Leftovers from last night's

#### **Nutrients**

When you eat breakfast, you are more likely to get all the nutrients your body needs for the day.

#### **Energy**

Food provides energy for your body. When you have energy, it is easier to think and accomplish your planned activities.

#### To break the fast

A fast is a time period when you eat and drink little or nothing. Breakfast fuels your body after an overnight fast and supplies needed nutrients.

#### Weight control

Breakfast eaters are less likely to overeat later in the day.

#### Learning

People who eat breakfast are ready to learn. Breakfast jump-starts problem-solving, concentrating and memorizing.

#### Don't like breakfast food?

- Breakfast can be anything!
- Some is better than nothing.
- Can't pass up a breakfast pastry? Just add fruit and milk.
